Getting Started
t Started!
The CarePoint Portal is the central point of entry providing a Single-Sign-On capability for all the applications in the CarePoint Suite. Navigating to the various applications available in the CarePoint Suite is accomplished simply by clicking on a main menu or submenu item located on the CarePoint Portal Global Navigation Bar. However, once you have successfully logged in to the CarePoint Portal for the very first time you must configure the CarePoint Portal Global Navigation Bar to display the applications you wish to access from the "Application Library".
Step-by-step instructions on how to populate the CarePoint Portal Global Navigation Bar with your desired applications can be found in the "Configuring the CarePoint Portal Global Navigation Menu Bar" section of the CarePoint Help window.
1. Click on the "Help" main menu item located on the CarePoint Portal Global Navigation Bar to expose the list of submenu items.
2. Click on the "CarePoint Help" submenu item to display the CarePoint Help window.

Proactive Patient Management

PPM provides a quick look at MHS Population Health Portal data. This includes Action Lists use to track patients with chronic illnesses and those who are due/overdue for clinical preventative services.

PPM provides the ability to auto-generate patient contact letters and Diabetic Report Cards that can be mailed fresh from the printer.

PPM also auto-generates Population Health reports as well as CPG's and HEDIS metrics reports.

Each patient name displayed is linked from the Pap, Mammo, and Colon Screen Overdue Lists to the 'Patient Summary' view

Southern Regional Medical Command (SRMC)

Proactive Patient Management

- **Track patients with chronic illness.**
- **Track patients due/overdue for Clinical Preventative Services.**
- **Track reports for Population Health.**
- **Track CPG's and HEDIS metrics.**
- **Allows users to send letters to patients alerting them of services due.**
- **Provides quick views for providers.**
- **Discussions on displaying CHCS live data side-by-side with Pop Health data.**
